*Claim Rejections - 35 USC § 102*

2. Claims 1,6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by McGee et al (5,860,920).

McGee is considered to teach all of the subject matter of the above claims, see figure 5 for example.

Re claims 2-5, the device of McGee could be modified in an obvious manner to connect to a variety of devices, such as stimulators or recorders. Re the method steps of claims 13+, one of ordinary skill in the art, which is typically a physician, would understand and appreciate that taking a baseline electrogram before ablating the tissue would be

essential in order to make sense of the subsequent electrogram to determine if the ablation was successful. Re claims 29+, one of ordinary skill in the art would know that various devices, such as programmers, are useful in modifying various system parameters which allows the physician to determine the proper stimulation level of the stimulus pulses, such as is commonly done in EP testing.

5. Claims 2-5,13-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mest (6,564,096).

The comments above regarding the McGee patent also apply to the device of Mest.
